Re: Matter 10/597,514; interview scheduled April 1 at 2pm Eastern (8/8/2012 o/p 24)

Remark

Claim 18 recites:

...and each lateral surface member comprising a first engaging structure on a first lateral end thereof and a second engaging structure on a second lateral end thereof, ...,

wherein the first and second engaging structures each comprises a projection and a recess, and a shape of the first engaging structure and a shape of the second engaging structure are in an asymmetrical relationship with reference to a center line of the lateral surface member.

We attached highlight FIG. 3(b) illustrating that "the first and second engaging structures ... are in an asymmetrical relationship with reference to a center line of the lateral surface member."

FIG. 5 of Yamazaki is also attached. We suggest that Yamazaki does not teach or suggest above limitation.
